## **Traumatic Brain Injury Study Day**

This two day course is designed for health professionals and carers working with individuals who have Traumatic Brain Injury Study Day.

This is a one day course for professionals and carers working with those with brain injury. This course investigates mechanisms of biological damage and brain injury recovery, including concepts of neuro-rehabilitation and recovery predictors.

Topics:

- Mechanism of brain injury – brain changes following TBI
- Acute injury states and decreased arousal
- Different traumatic brain injury classifications
- Concussions and post concussive syndromes
- Cognitive changes following brain injury
- Post Traumatic Amnesia - what is it and what does it mean?
- Vision disorders and brain injury
- Management of the upper limb
- Rehabilitation of executive functions
- Predictors of recovery
- Neuroplasticity
- Rehabilitation in the community
